SUMMARY

Product professional with ~2 years of experience spanning product analytics and revenue forecasting in ad tech (programmatic advertising, RTB, cross-partner bidding) at Media.net. Assessed revenue forecasting accuracy for \$250K+ in daily web advertising spend across Google, Microsoft, Yahoo, and Bing, and lead analytics strategy across 3 engineering teams. Shipped a language-serving optimization model and an automated experiment-analysis platform, together adding \$25K/day in revenue. Strong in SQL/Python, A/B testing, bidding strategy, and cross-functional stakeholder management.

WORK EXPERIENCE

MEDIA.NET — Global adtech company (programmatic advertising platforms) Mumbai + Bangalore, India
Lead Product Analyst Jan 2026 – Present
(promoted from Senior PA in 18 months)

- **Assessed revenue forecasting accuracy for \$250K+ in daily ad spend** across demand partners: Google, Microsoft, Yahoo, and Bing, split across visibility, click-likelihood, and revenue-per-click models.
- **Lead analytics strategy across 3 engineering teams**, turning bidding and revenue-prediction changes into build priorities.
- **Leading the App Monetization initiative**, building new ad and landing-page strategies and new prediction tools to close the app-vs-web performance gap.
- **Shipped new model features**, including contextual-base development for app and chat traffic.
- **Built a prediction-model feature analyzer** to evaluate candidate features and prune underperforming existing ones.
- **Built a prediction agent that surfaces why an entity is loss-making** and lets users add their own RCA validators to the default check, cutting manual debugging effort.

Senior Product Analyst Jul 2024 – Jan 2026

- **Led cross-functional expansion of search ad monetization** through language and cultural targeting, adding \$25,000/day.
- **Built a language-serving model** that auto-tests and serves the ideal language per geography, replacing manual mapping.
- **Built a platform for automatic analysis of bidding and buying experiments**, enabling faster, cleaner experimentation.
- Drove optimization of news-based publisher prediction models and a demotion system for new revenue-generating keywords.
- **Built an in-house interface for 20+ apps**, adopted by 250+ employees company-wide (~100 DAUs, 10% of the company).

SOCIAL ALPHA — Venture capital firm (energy & climate) Bangalore, India
Venture Capital Intern Jan 2024 – Jun 2024

- Evaluated startups and market spaces for investment, on existing and new theses, up to ₹2 crore in energy and climate.
- Tracked portfolio startup performance across key metrics to validate investment impact and thesis accuracy.
- **Built partnerships with 500+ incubators** across India.

SUPERFUEL — Early-stage startup Bangalore, India
Founder's Office Intern Jul 2023 – Dec 2023

- Built performance dashboards for an early-stage startup with dynamic requirements, for internal and partner-facing use.
- Led development of seller tools that strategically selected products and campaigns to optimize seller performance.
- Built a marketplace optimization funnel to identify and partner with high-success-rate clients.

INFIHEAL — Mental health app startup Remote, India
Product Intern Aug 2022 – Jun 2023

- Built the PRD and the automated testing vertical.
- Worked cross-functionally across tech, ML, therapists, and design to build features and roadmaps for the app.
- Led UI/UX, providing customer research and solutions for the organization.

EDUCATION

BITS Pilani Aug 2019 – Jul 2024
